

exim**Safe** Ladder Mat – Slip Protection for Ladders

1. PRODUCT DESCRIPTION

exim**Safe** Ladder Mat significantly improves the stability and standing of ladders, on both, rough and slippery surfaces. As an additional benefit, the ground surface is protected from any damage such as indentations resulting from the ladder legs. exim**Safe Ladder Mat** consists of a ground plate and an upstanding strip. The product is made of recycled tyres making it an environmentally friendly and meaningful application. As it is 100 % recyclable, exim**Safe Ladder Mat** is part of an environmentally sound, closed material cycle.

2. SCOPE OF DELIVERY AND DIMENSIONS

On request.

3. TECHNICAL DATA

Surface structure:	coarse with granulate texture
Density (kg/m ³):	approx. 800
Slip resistance:	tested according to prEN 131-2:2003
Fire classification:	B2 according to DIN 4102 (resistance to flying sparks, heat)

4. MATERIAL

Rubber granulate, bonded with PU binder.

5. INSTALLATION

The legs of the ladder shall be placed against this strip to protect them from slipping.
